Cem-FIL® 70

AR Chopped Strands for Rendering Mortars

PRODUCT DESCRIPTION

Cem-FIL® 70 is a special purpose AR glass fiber chopped strand designed for mixing with cement and other materials where a high degree of dispersion of the fibers is needed.

PRODUCT APPLICATION

Cem-FIL® 70 is typically used in the modification of specialist mortars and industrialized processes.

Cem-FIL® 70 chopped strands have a sizing system which is water dispersible, allowing full dispersion into individual filaments when mixing in an aqueous environment. It is mainly used in renders and mortars.

ADVANTAGES AND BENEFITS

- Excellent workability
- Control and prevention of cracking in fresh concrete
- Improves the thixotropy of the mortar, making it easy to apply
- High dispersion : 100 million of filament per Kg in fiber length 12 mm
- Safe and easy to handle
- Virtually invisible on the finished surface
