Cem-FIL® 62
AR Chopped Strands for Dry Mix Mortars and Premix GRC

PRODUCT DESCRIPTION
Cem-FIL® 62 is a high integrity AR glass fiber chopped strand designed for use in dry mix systems or other premixing processes for subsequent molding into a GRC component.

PRODUCT APPLICATION
Cem-FIL® 62 chopped strands have a sizing system optimized for abrasion resistance and strand integrity during blending with dry materials. The low-tex strand permits efficient reinforcement at low dosages. It is particularly suited for the preparation of pre-bagged mixes of repair and top screed mortars.

It may also be used in the vibration-cast manufacture of standard GRC components.

ADVANTAGES AND BENEFITS
- High integrity during mixing
- Low tex strand
- Easy incorporation
- High performance with low dosage
- Excellent reproduction of detail
- High level of workability
- Low water demand
- Improves mechanical performance of GRC elements
- Makes highly durable GRC elements
- Safe and easy to handle

• Electrical Conductivity: Very low
• Specific Gravity: 2.68 g/cm³
• Material: Alkali Resistant Glass*
• Softening point: 860°C • 1580°F
• Chemical Resistance: Very high
• Modulus of elasticity: 72 GPa • 10x10⁶ psi
• Tensile Strength: 1,700 MPa • 250 x 10⁷ psi

* Our fibers are manufactured with high Zirconium content in compliance with ASTM C1666/C 1666/M-07 and EN 15422 and under the recommendations of PCI and GRCA.
Cem-FIL® 62
AR Chopped Strands for Dry Mix Mortars and Premix GRC

HOW TO USE – DOSAGES
For repair mortars, recommended dosage is in between 1 to 2%, or 25 to 50 kg/m³ (42 – 84 lb/cu.yd).
For Premix GRC, recommended dosage is from 2.5 to 3.5% by weight.

PACKAGING and STORAGE
Cem-FIL® 62 chopped strands are packed in individual plastic bags and contained in carton boxes.
Cem-FIL® 62 chopped strands should be stored away from heat and moisture, and in their original packaging. The best conditions are:
• Temperature: 15°C – 35°C.
• Humidity: 35% – 65%.

If the product is stored at lower temperatures it is advisable to condition it in the workshop for at least 24 hours before use, to prevent condensation.

QUALITY STANDARDS – CERTIFICATION
• Cem-FIL® 62 fibers are manufactured under a quality Management System approved to ISO 9001.
• Cem-FIL® 62 fibers fulfill all the prescribed requirements described in the European Technical Approval ETA-11/0410, attested by the EC-Certificate of conformity 0672-CPD-I 13.15.5. So the CE marking is affixed on the packaging of Cem-FIL® 62 fibers and on the accompanying commercial documents
• Cem-FIL® fibers are not classified as dangerous by the Regulation 1272/2008/EC. For more information, please refer to our Safe Use Instructions Sheet.
